GitHub: <https://github.com/sravani-engineer> | Portfolio: <https://sravani-engineer.github.io/portfolio/> | Telangana, India

PROFESSIONAL SUMMARY

- Machine Learning Engineer building production-oriented ML systems focused on robustness, failure analysis, and real-world deployment reliability.
- Proven ability to evaluate models under distribution shift using large-scale datasets (22,000+ samples), identifying performance gaps and improving system performance and reliability.

WORK EXPERIENCE

INFINITUDE IT PVT. LTD | Intern

Mar 2024 – Aug 2024

- Developed and deployed real-time ML applications using Python and computer vision for a gesture recognition system, demonstrating potential real-world interaction use cases
- Optimized inference pipelines and resolved 12+ system-level issues, improving latency (~30%) and deployment stability
- Reduced server downtime by 20% by designing and implementing secure, automated server workflows using SSH and Linux

PROJECT EXPERIENCE

Hand Gesture Recognition – Real-World Failure Analysis

GitHub: <https://github.com/sravani-engineer/robust-hand-gesture-recognition>

- Built a real-time gesture recognition system using **MediaPipe and machine learning pipeline**, evaluated on **12 sessions across 5 users (~22K frames)**
- Implemented **session-based validation** to eliminate data leakage and ensure realistic evaluation
- Identified **~12% performance drop under distribution shift** and analyzed failure patterns

Impact:

- Identified critical weaknesses in standard evaluation methods, exposing overfitting and a ~10% performance drop under domain shift

Skill Swap Hub – Secure Server Automation

- Implemented SSH key-based authentication, eliminating 100% of password-based access and improving system security
- Automated server configuration using Ansible, reducing manual setup time by ~40% and enabling scalable multi-environment deployments

Impact:

- Strengthened system security and reduced deployment effort through automation across multiple environments

Promulgate Innovations – Digital Marketing Web Design

- Designed user-centric UI/UX prototypes using Figma, resulting in a 15% reduction in bounce rate.
- Enhanced user flow through iterative design and stakeholder feedback, increasing usability and engagement

Impact:

- Improved user navigation efficiency and engagement through structured UI/UX design

SKILLS

- Programming Languages:** Python, SQL, C++, Data Structures, JavaScript, Shell Scripting
- Machine Learning:** NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, EDA, Deep Learning, Model Evaluation
- Computer Vision:** OpenCV, MediaPipe
- Databases:** MySQL, Microsoft SQL Server
- Tools and Platforms:** Git, GitHub, Linux, Excel, Postman, Figma, AWS (EC2, S3, RDS, IAM, VPC)

EDUCATION

Bachelor of Technology (Computer Science Engineering)

Mahatma Gandhi Institute of Technology, Hyderabad | 2019 – 2023 | CGPA: 7.0

Intermediate (MPC)

Krishnaveni Junior College, Khammam, Telangana | 2017 – 2019 | 95.3%

SSC (10th Grade)

KGBG Vidyalayam, Khammam, Telangana | 2016 – 2017 | CGPA: 9.2

CERTIFICATIONS

NPTEL – Social Networks | Oct 2021

Coursera – Programming for Everybody (Python), University of Michigan | Apr 2022

Forage – Accenture Data Analytics & Visualization Simulation | Nov 2024

Forage – Goldman Sachs Operations Simulation | Dec 2024
