GitHub: <https://github.com/sravani-engineer> | Portfolio: <https://sravani-engineer.github.io/portfolio/> | Telangana, India

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in backend development, machine learning, and Python application development. Skilled in Python, Django, Django REST Framework, SQL, Git, Linux, REST APIs, data processing, and computer vision. Experienced in developing backend APIs, data ingestion pipelines, automation workflows, and machine learning systems. Strong foundation in Data Structures, Algorithms, DBMS, Operating Systems, and Networking, with a focus on building reliable and scalable software solutions.

WORK EXPERIENCE

INFINITUDE IT PVT. LTD | Software Engineer Intern

Mar 2024 - Aug 2024

- Developed and deployed real-time ML applications using Python and computer vision for a gesture recognition system, demonstrating potential real-world interaction use cases
- Optimized inference pipelines and resolved 12+ system-level issues, improving latency (~30%) and deployment stability
- Reduced server downtime by 20% through automated SSH-based Linux server workflows while leveraging AWS and Jenkins to support deployment and DevOps processes.

PROJECT EXPERIENCE

Hand Gesture Recognition – Real-World Failure Analysis

GitHub: <https://github.com/sravani-engineer/robust-hand-gesture-recognition>

- Built a real-time gesture recognition system using **MediaPipe and machine learning pipeline**, evaluated on **12 sessions across 5 users (~22K frames)**
- Implemented **session-based validation** to eliminate data leakage and ensure realistic evaluation
- Identified **~12% performance drop under distribution shift** and analysed failure patterns

Impact:

- Identified critical weaknesses in standard evaluation methods, exposing overfitting and a ~10% performance drop under domain shift

ESG Emissions Data Ingestion & Normalization Platform

GitHub: <https://github.com/sravani-engineer/breathe-esg-assignment>

- Developed a Django REST Framework backend for ingesting, processing, and normalizing ESG emissions data from CSV files through REST APIs.
- Designed 5 core data models and integrated data normalization, duplicate detection, approval workflows, audit logging, and analytics dashboard functionality.

Impact:

- Processed 10+ raw emissions records into standardized records for reporting and analytics workflows.

Skill Swap Hub – Secure Server Automation

- Strengthened server security by replacing password-based access with SSH key authentication.
- Automated server configuration using Ansible, reducing manual setup time by ~40% and enabling scalable multi-environment deployments

Impact:

- Improved deployment efficiency and infrastructure security through automation.

SKILLS

- Programming Languages:** Python, SQL, C++, JavaScript, Shell Scripting
- Backend Development:** Django, Django REST Framework (DRF), REST APIs
- Machine Learning:** NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, EDA, Deep Learning, Model Evaluation, Computer Vision (OpenCV, MediaPipe)
- Databases:** MySQL, Microsoft SQL Server
- Core Concepts:** Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks
- Tools and Platforms:** Git, GitHub, Linux, Excel, Postman, Jenkins, AWS (EC2, S3, RDS, IAM, VPC)

EDUCATION

Bachelor of Technology (Computer Science Engineering)

Mahatma Gandhi Institute of Technology, Hyderabad | 2019 - 2023 | CGPA: 7.0

Intermediate (MPC)

Krishnaveni Junior College, Khammam, Telangana | 2017 - 2019 | 95.3%

SSC (10th Grade)

KGBG Vidyalayam, Khammam, Telangana | 2016 - 2017 | CGPA: 9.2

CERTIFICATIONS

NPTEL – Social Networks | Oct 2021

Coursera – Programming for Everybody (Python), University of Michigan | Apr 2022

Forage – Accenture Data Analytics & Visualization Simulation | Nov 2024

Forage – Goldman Sachs Operations Simulation | Dec 2024
